

IRIDIUM AERONAUTICAL PAGE SERVICE

International air travel routes (August 1, 1999)

Using Message Delivery Areas (MDAs)

A traveler flying from Miami, Florida, USA to Buenos Aires, Argentina would select two MDAs—2030 and 2040. After arriving, aeronautical MDAs should be deleted.

- Major international airport serviced by air travel route
 - Origination/ Destination Zone*
 - International air travel route
- * If your departure airport is not indicated on the map, use the nearest MDA for maximum coverage.

Paging service may not be available in certain countries due to government restrictions. For information on paging service availability check our Web site at www.iridium.com.
